DIAPER RASH?

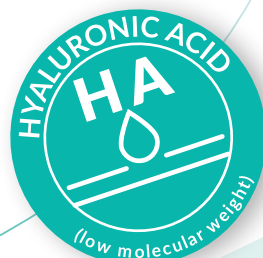

DERMATOP BABY CREAM

soothes, protects and helps repair with pure
hyaluronic acid

www.fidiapharma.com

DERMATOP BABY CREAM

Is the appropriate fraction
for supporting the healing
of skin lesions ⁽¹⁾

Dermatop Baby is a cream formulation for diaper change in infants and children, in case of irritation and redness.

It restores the skin's natural barrier, thanks to the synergic action of:

- Hyaluronic acid (low molecular weight)
- Zinc oxide
- Oat seed extract
- Panthenol
- Rice bran oil

DERMATOP BABY CREAM

is easy to apply
and remove.
It is tested under
pediatric control and
dermatologically tested
on sensitive skin.

ADVANTAGES

PROTECTS

It has a protective
function, forming a film
barrier on the skin.

SOOTHES

It reduces the redness
on the diaper area.

HELPS REPAIR

It supports the
restoration of the skin's
natural barrier.
